MADHAN SHANMUGAM

SOFTWARE ENGINEER

Coimbatore, India | 9344907744 | madhanshanmugam556@gmail.com | madhans.is-a.dev | linkedin.com/in/madhans23 | github.com/MadhanS2302

SUMMARY

Passionate software engineer with a strong academic foundation in AI, Data Science, and SQL, backed by hands-on internship experience building production web applications. Proven problem-solver with multiple hackathon and coding-competition wins, including first place for an AI-powered blood donation platform. Eager to bring full-stack development skills and a fast-learning mindset to a growing engineering team.

TECHNICAL SKILLS

Fullstack Development	Java	Problem Solving
Git & GitHub	Teamwork & Collaboration	Reinforcement Learning (AWS)
SQL	Fast / Quick Learner	Machine Learning Basics

PROFESSIONAL EXPERIENCE

Intern — Guidewave Limited, Wiltshire *Aug 2025 – Dec 2025*

- Developed web applications using Next.js.
- Built the Creative IT Plus e-learning platform on Next.js, enhancing user engagement and learning experience.
- Created interactive student dashboards and writing tools, optimizing frontend performance for faster load times and ensuring responsive design with Tailwind CSS.

Intern — KG Micro College, Coimbatore *Jul 2024 – Oct 2024*

- Developed software solutions through coding and project collaboration.
- Contributed to test case development for the MGC project at KGM, enhancing testing accuracy.
- Completed Python programming training at Cognoorise Company.
- Applied coding skills and explored machine learning applications at KGX, gaining practical experience.

PROJECTS

WeRespond — Community-Based Emergency Response Platform

Developed a real-time emergency response platform connecting people in distress with nearby volunteers for faster assistance during accidents, medical emergencies, fires, and other critical situations. Built using React Native, Node.js, Express.js, MySQL, and location-based services.

WeDonate — Digital Donation & Resource Management Platform

Developed a digital platform connecting donors with individuals and organizations in need, enabling users to donate essential resources and track donation requests. Designed to improve transparency, accessibility, and efficient distribution of donated resources using web technologies and data base integration.

WeHere — Smart Community Assistance Platform

Developed a community-focused platform helping people find and provide immediate assistance for everyday needs by connecting users with nearby individuals and available resources. Implemented a technology-driven, location-aware solution to improve accessibility, communication, and community participation.

EDUCATION

MSc. Software Systems — KG College of Arts and Science, Coimbatore, India *Expected 05/2027*

SSLC & HSC — Sindhi Vidyalaya Matriculation Higher Secondary School, Coimbatore, India *04/2022*

KEY ACHIEVEMENTS

Multiple accolades across coding competitions and hackathons, demonstrating strong problem-solving skills and technical proficiency.

1st Place — Nehru Arts and Science College Hackathon, Coimbatore, Tamil Nadu *5–6 Feb 2026*

- Built WeDonate, a unified AI-powered blood donation coordination platform solving critical healthcare shortages through real-time donor scheduling, shortage prediction, and a value-based repayment system for sustainability.

2nd Place — Sri Ramakrishna College Hackathon, Coimbatore, Tamil Nadu *13–14 Dec 2025*

- Built WeRespond, a community-powered AI emergency rescue platform, in a 24-hour hackathon — using AI-powered geo-matching to connect victims with nearby citizen first-responders before official help arrives.

Participant — AWS DeepRacer Bootcamp, Coimbatore, Tamil Nadu *23–25 Aug 2024*

- Shortlisted from 500+ teams for a 48-hour bootcamp; trained reinforcement learning models on virtual tracks using AWS credits, with models deployed to physical autonomous cars for real-track racing.

STRENGTHS

Communication (Written & Verbal)	Adaptability	Critical Thinking & Problem Solving
Leadership	Emotional Intelligence	Detail-oriented
