MADHAN SHANMUGAM

Software Engineer

PROFESSIONAL SUMMARY

I am a passionate tech enthusiast who is eager to immerse myself in AI, Data Science, and SQL. With a strong academic background and hands-on experience from internships, I thrive on learning and creating innovative software solutions. My participation in various hackathons showcases my problem-solving skills. I am now ready to contribute to your company's growth and value.

WORK HISTORY

Intern, 08/2025 to 12/2025
GUIDEWAVE LIMITED - Wiltshire

- Developed web applications using Next.js
- Developed Creative IT Plus e-learning platform using Next.js, enhancing user engagement and learning experience.
- Created interactive student dashboards and writing tools, optimizing frontend performance for faster load times and ensuring responsive designs with Tailwind CSS.

Intern, 07/2024 to 10/2024
KG Micro College - Coimbatore

- Developed software solutions through coding and project collaboration
- Contributed to test case development for MGC project at KGM, enhancing testing accuracy
- Completed Python programming at Cognoorise Company
- Applied coding skills and explored machine learning applications at KGX, gaining practical experience

EDUCATION

MSc. Software Systems, 05/2026
KG College of Arts and Science - Coimbatore, India

SSLC & HSC, 04/2022
Sindhi Vidyalaya Matriculation Higher Secondary School - Coimbatore, India

ACCOMPLISHMENTS

First Place
5th & 6th February 2026
Coimbatore, Tamil Nadu
Won 1st Place in Smart Healthcare Solutions track. Built 'weDonate' - unified platform for blood donation coordination solving critical healthcare problem. Challenge: Blood banks face unpredictable donor turnout, mismatched availability, and poor shortage visibility. Solution: Real-time donor scheduling, AI-powered shortage prediction, and value-based repayment system for sustainability.
weDonate - Smart Blood Donation Coordination Platform

Second Place
13th & 14th December 2025
Coimbatore, Tamil Nadu
24-hour hackathon at Sri Ramakrishna College of Arts & Science. Built 'WeRespond' - community-powered emergency rescue platform. Problem: Women/elderly can't share location during emergencies, especially without internet. Solution: AI-powered geo-matching connecting victims with nearby citizen first-responders before official help arrives.
WeRespond - AI Emergency Rescue Platform

Participation
23rd - 25th August 2024
Coimbatore, Tamil Nadu
48-hour AWS DeepRacer bootcamp. Shortlisted from 500+ teams. Trained reinforcement learning models on virtual tracks using AWS credits. Models deployed to physical autonomous cars for real-track racing.
Autonomous Racing Model - Reinforcement Learning

Secured multiple accolades in coding competitions and hackathons demonstrating problem-solving skills and technical proficiency.

SKILLS

- Fullstack development
- Git&GitHub
- Teamwork and collaboration
- Fast learner
- Quick learner
- SQL
- Java

KEY ACHIEVEMENTS

Achievements in Hackathons and Coding Competitions, Secured multiple accolades in coding competitions and hackathons demonstrating problem-solving skills and technical proficiency

STRENGTHS

- Communication(Written And Verbal)
- Leadership
- Critical Thinking & Problem Solving
- Adaptability
- Emotional Intelligence
